

TURING

WINTER OILSEED RAPE

Turing is the highest yielding variety based on seed yield on the Recommended List, and just one percent point off the highest yielding varieties for gross output for the UK, with strong performance in both East/West and North regions. Its excellent yield potential is combined with very good light leaf spot resistance, and outstanding autumn and spring vigour.

KEY CHARACTERISTICS

Data Source: AHDB Recommended / Described List for 2024/25 reproduced with full acknowledgement to AHDB.

- Highest seed yield and high gross output combined with high oil content
- Very good light leaf spot resistance
- Good stem stiffness and resistance to lodging

OUTPUT UK

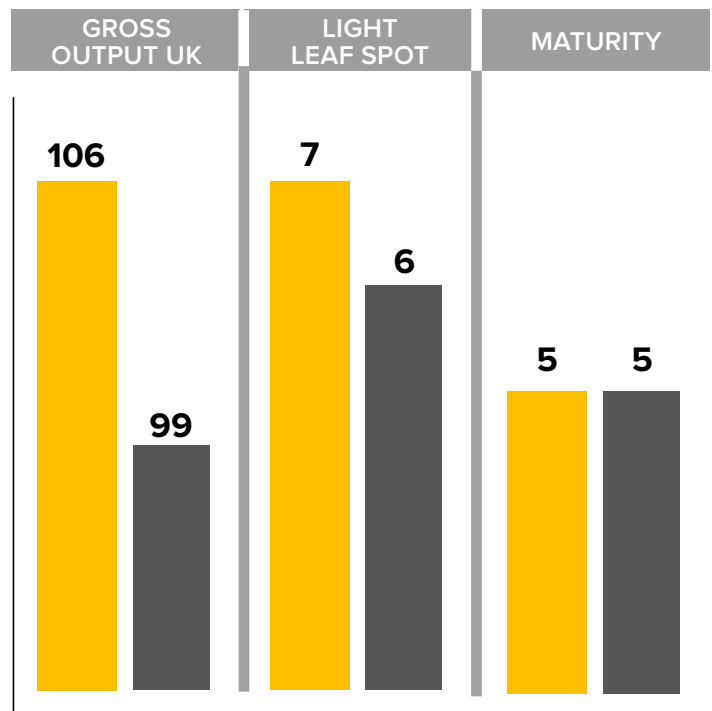

Gross output (yield adjusted for oil content)	106
Oil content	44.4

AGRONOMICS

Resistance to lodging	(8)
Stem stiffness	8
Shortness of stem	6
Earliness of flowering	8
Earliness of maturity	5

DISEASE

Light leaf spot	7
Stem canker	4

■ Turing ■ DK Expansion

DK Expansion is a control variety on the current RL

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree.
