## KEY CHARACTERISTICS

Data Source:  
AHDB Candidate List for 2025/26

- ◆ High gross output
- ◆ TuYV resistant
- ◆ Stem canker resistance from RlmS

### OUTPUT

|   |      |
|---|------|
| Gross output (yield adjusted for oil content) | 107  |
| Oil Content                                   | 45.4 |

### AGRONOMICS

|                        |   |
|------------------------|---|
| Resistance to lodging  | 8 |
| Stem stiffness         | 8 |
| Earliness of flowering | 5 |
| Earliness of maturity  | 5 |

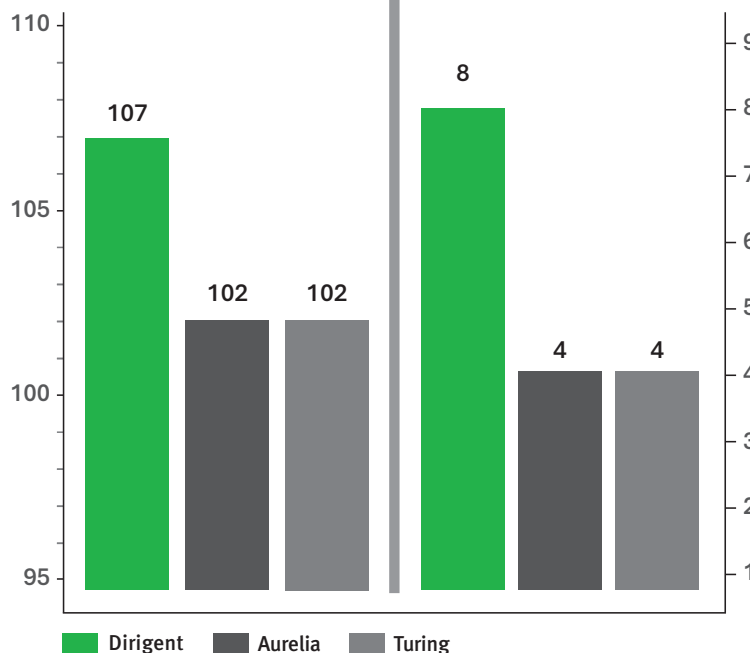

### DISEASE

|                 |   |
|-----------------|---|
| Light leaf spot | 6 |
| Stem canker     | 8 |

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree.
