

# KARAT

## WINTER OILSEED RAPE

Karat is a candidate variety for recommendation. It's exceptional gross output comes from a combination of outstanding seed yield and oil content. Karat is the first variety to feature the new Rlm12 resistance to Stem canker in combination with RlmS resistance. This is the basis for exceptional stem health including a LLS score of 8 and a strong agronomic package.

## KEY CHARACTERISTICS

Data Source:  
AHDB Candidate List for 2025/26

- ◆ RlmS and Rlm12 Stem canker resistance
- ◆ Very high yield and oil content
- ◆ Very strong LLS resistance + TuYV

### OUTPUT

Gross output (yield adjusted for oil content)	109
Oil Content	46.8

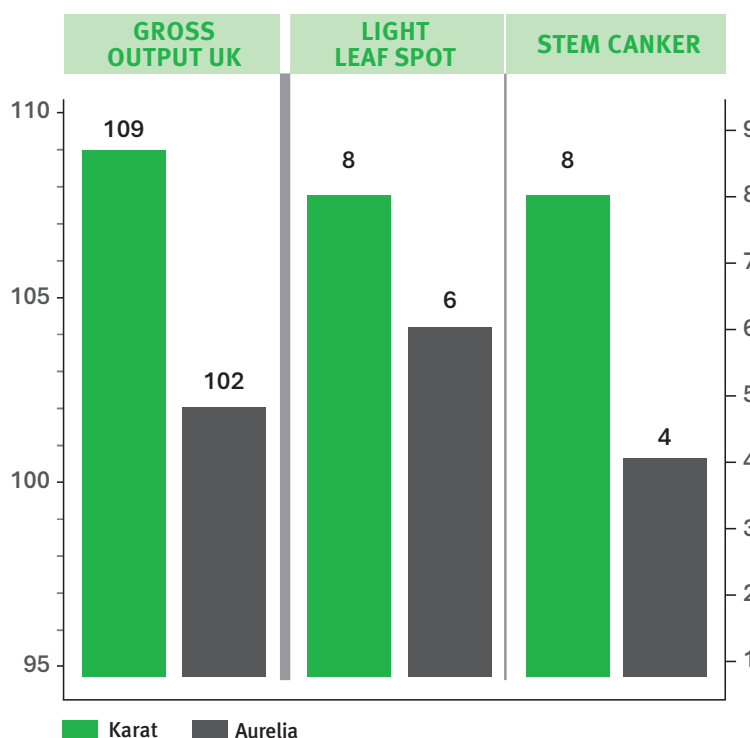

### AGRONOMICS

Resistance to lodging	8
Stem stiffness	8
Earliness of flowering	5
Earliness of maturity	5

### DISEASE

Light leaf spot	8
Stem canker	8

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree.
