

# KARAT

## WINTER OILSEED RAPE

“ Fast autumn and spring development. Good disease package, combining Rlm12 and RlmS - the first stacking of these phoma genes - and good stem health. A taller, stiff type with deep canopy. Good for mid to late drilling ”

*Craig Padley, NPZ UK Oilseed Rape Breeder*

## KEY CHARACTERISTICS

*Data Source: AHDB Recommended List for 2026/27  
reproduced with full acknowledgement to AHDB*

- ◆ Combined RlmS and Rlm12 Stem canker resistance
- ◆ Very high yield and oil content
- ◆ Very strong LLS resistance + TuYV

### OUTPUT

Gross output (yield adjusted for oil content)	106
Oil Content	46.8

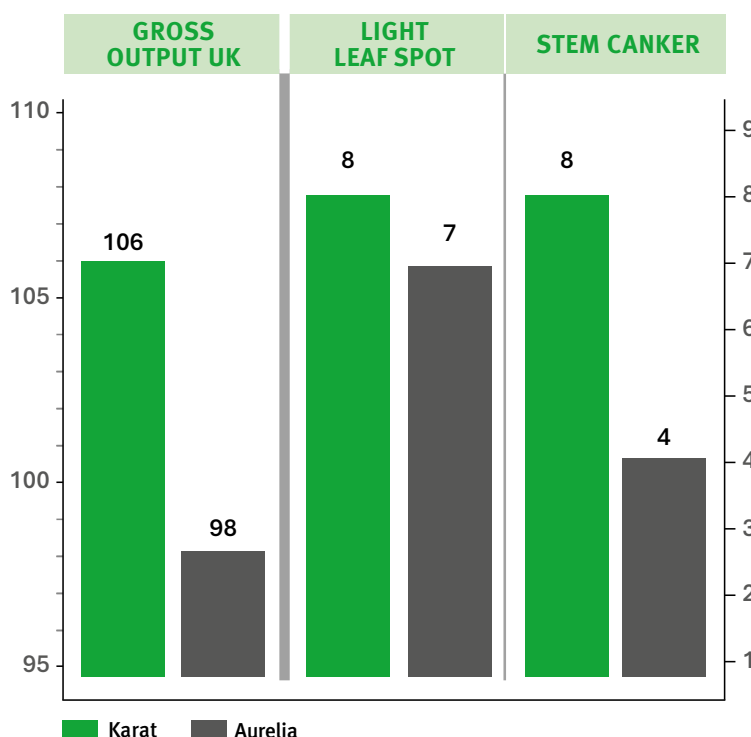

### AGRONOMICS

Resistance to lodging	8
Stem stiffness	8
Earliness of flowering	6
Earliness of maturity	5

### DISEASE

Light leaf spot	8
Stem canker	8

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree.
