

MONTANA

WINTER OILSEED RAPE

“ Fast autumn and spring development. Good overall disease package (RlmS) and stem health including high tolerance to verticillium. Stiff, medium height with a deep canopy. Suitable for a wide sowing window. ”

Craig Padley, NPZ UK Oilseed Rape Breeder

KEY CHARACTERISTICS

Data Source: AHDB Recommended List for 2026/27 reproduced with full acknowledgement to AHDB

- ◆ High seed yield with high gross output
- ◆ Exceptional RlmS & Rlm12 stem canker resistance
- ◆ Outstanding Light leaf spot resistance
- ◆ TuYV resistant

OUTPUT

Gross output (yield adjusted for oil content)	106
Oil Content	46.7

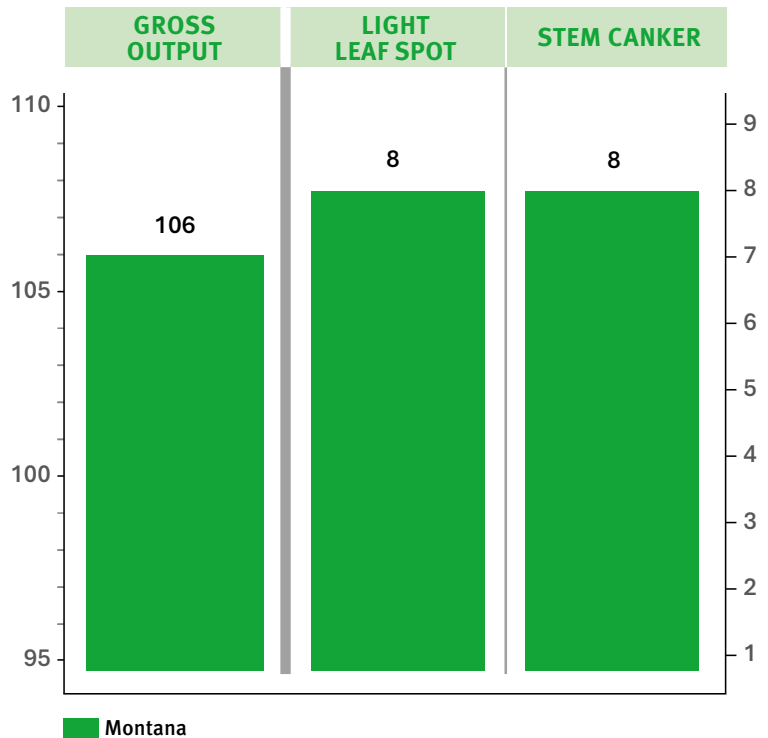

AGRONOMICS

Resistance to lodging	8
Stem stiffness	8
Earliness of flowering	5
Earliness of maturity	6

DISEASE

Light leaf spot	8
Stem canker	8

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree.
