

CROWN

WINTER OILSEED RAPE

“ Fast autumn and very fast spring development. Good disease package - combining Rlm7/RlmS - and good stem health. Taller, stiff type and medium to later sowing dates. A high oil content. Crown looks to be the next step forward in the clubroot sector. ”

Craig Padley, NPZ UK Oilseed Rape Breeder

KEY CHARACTERISTICS

Data Source: AHDB Recommended List for 2026/27 reproduced with full acknowledgement to AHDB

- ◆ High resistance to stem canker
- ◆ High resistance to Light leaf spot
- ◆ TuYV resistant

OUTPUT

Gross output (yield adjusted for oil content)	104
Oil Content	47.1

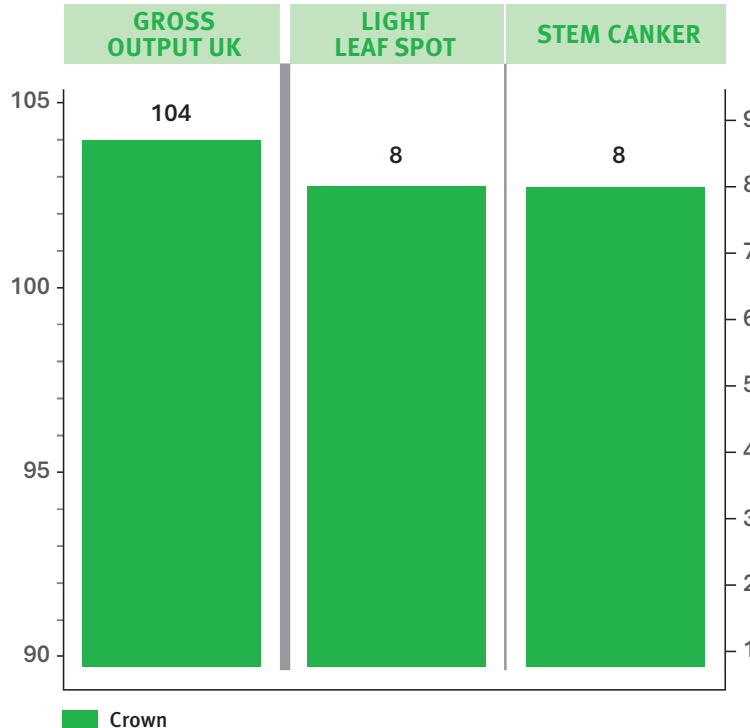

AGRONOMICS

Resistance to lodging	8
Stem stiffness	8
Earliness of flowering	6
Earliness of maturity	5

DISEASE

Light leaf spot	8
Stem canker	8

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree.

Crown is clubroot resistant.
