## KEY CHARACTERISTICS

Data Source:  
Terres Inovia - L'institut des oléagineux, 2025

- ◆ High grain and protein yield potential
- ◆ Alternative to spring peas in regions with risk of early summer drought
- ◆ Very good winter hardiness
- ◆ Good lodging resistance, even under difficult conditions

### OUTPUT

Yield as % control **108.6**

### TOLERANCE

Lodging at maturity **TT**

Winter cold **TT**

Iron chlorosis **T**

TT = Very Tolerant    T = Tolerant

### AGRONOMICS

Earliness of maturity **Late**

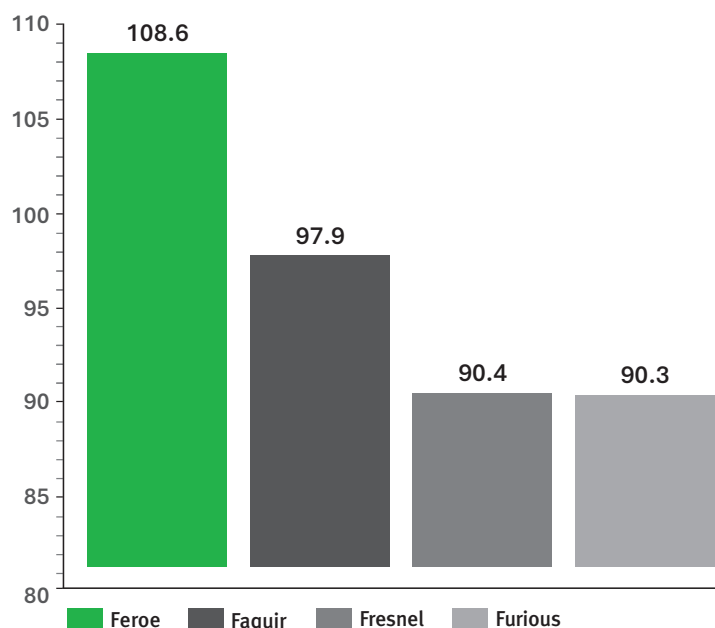

Earliness of flowering **Intermediate**

### SEED CHARACTERISTICS

Thousand Grain Weight Class (g) **180–200**

Protein content **Low**

### YIELD PERFORMANCE

+44 (0) 1223 236808
