

# VEGAS

## WINTER OILSEED RAPE

“ Very fast autumn and spring development, standing out at these times. Vegas set the standard for Light leaf spot and stem Canker (RLmS) resistance on the RL and this has remained stable and effective. Short and very stiff with a compact canopy which aids speedy harvest ”

*Craig Padley, NPZ UK Oilseed Rape Breeder*

## KEY CHARACTERISTICS

*Data Source: AHDB Recommended List for 2025/26 reproduced with full acknowledgement to AHDB*

- ◆ Very high yielding
- ◆ Exceptional RLmS phoma resistance
- ◆ Very good light leaf spot resistance

### OUTPUT

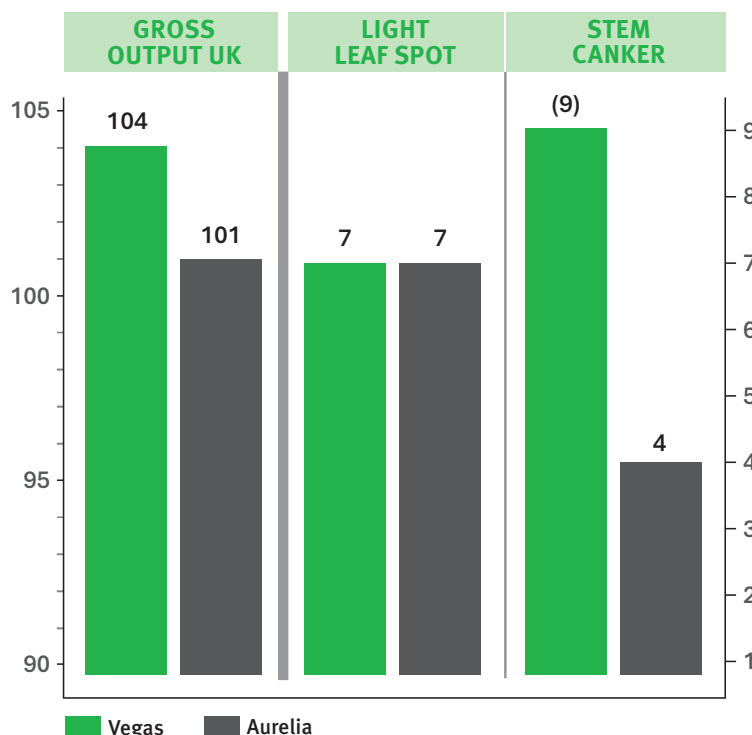

Gross output (yield adjusted for oil content)	104
Oil content	45.5

### AGRONOMICS

Resistance to lodging	(7.9)
Stem stiffness	8
Earliness of flowering	8
Earliness of maturity	5

### DISEASE

Light leaf spot	7
Stem canker	(9)

Aurelia is a control variety on the current RL

Ratings above are 1-9. A high rating indicates that the variety shows the character to a high degree.
